

Event Report of Civil Engineering Department

TOWERING TRIUMPHS

Introduction: The event aims to encourage participants to apply engineering concepts in a fun and competitive setting, emphasizing structural stability, material strength, and innovative design techniques. It fosters teamwork and problem-solving skills while challenging participants to think critically about real-world engineering constraints. The exercise teaches essential **lessons about the creative product development process** and the nature of collaboration.

Team Specification: 1-3 Members.

Date & Venue: Nov. 10. 2024 at VLTC L-009.

No. of teams participated: 20 teams.
